2.	Zonish Ahmed	02-235222-022	
3.	Bilal Masroor	02-235222-034	
EXECUTIVE SUMMARY OF PROJECT PROPOSAL			
<p>As we know that everything is going online and due to this the businesses are also working online. Everyone is displaying their products on various E-commerce's websites as it is the modern way of doing a business. To support that we will build an online E-commerce store for buying laptops which will be easier for the users as they can read reviews online and can browse through the company's profile to see if they are doing an authentic business.</p>			
PROJECT PURPOSE			
<p>The sole purpose of this project is to create a simple and static website for startups so that they can have their online appearance and can promote their business with just a link of their website.</p>			
PROJECT SCOPE AND OBJECTIVES			
<p>The objective of this project to allow a business to grow more with their E-commerce store and help them in getting more sales and have more profit for their business.</p> <p>TECHNOLOGIES WE ARE USING:</p> <ul style="list-style-type: none">• HTML• CSS <p>PAGES OUR WEBSITE WILL BE BASED ON:</p> <ul style="list-style-type: none">• HOME• ABOUT US• CONTACT US• PRODUCTS			
PROJECT DESCRIPTION (MOST IMPORTANT)			
<p>This E-commerce store website for laptops will be created by using HTML5 & CSS3 only. We will use HTML for creating the structure of our website from top to bottom and we will use CSS for styling our various pages. This website will include 4 pages which will include the Homepage which is the landing page of every standard website. Then the about us page for some description of the store or the company. Then a contact us page where users can get in touch with us, this page will include our Email and other social media links. In last we will create a product page which will include all our products. So users can browse through the prices and get more information about them.</p>

PROJECT DELIVERABLES
Project deliverables are: <ul style="list-style-type: none">Plan ReportProgress ReportMaintenance ReportA static website
ASSUMPTIONS AND CONSTRAINTS
The constraints and limitations we will face while building this website will include: <ul style="list-style-type: none">We can't store users' information as we have no database to store it.We cannot validate forms as there is no back end to validate it properly.There will be zero to no interaction between a user and a website.This is only a front end which means it is only a static website to promote a business.Users cannot buy products through this website as it will not include a payment gateway.There will be no features such as add to cart.
